Contents Volume 66

Contents

Is software work routinized? Some empirical observations from Indian software industry
P.V. Ilavarasan and A.K. Sharma 1

A quantitative and qualitative analysis of factors affecting software processes
A. Rainer and T. Hall 7

De-motivators for software process improvement: an analysis of practitioners' views
N. Baddoo and T. Hall 23

Generating test cases from class vectors
K.R.P.H. Leung, W. Wong and J. Kee-Yin NG 35

Optimal testing-resource allocation with genetic algorithm for modular software systems
Y.S. Dai, M. Xie, K.L. Poh and B. Yang 47

Detecting associative shift faults in predicate testing
I. Stamelos 57

Quality assurance under the open source development model
L. Zhao and S. Elbaum 65

Controversy Corner: Open source software—an evaluation
A. Fuggetta 77

Combining techniques to optimize effort predictions in software project management
S.G. MacDonell and M.J. Shepperd 91

Queueing network analysis: concepts, terminology, and methods
R.O. Baldwin, N.J. Davis IV, S.F. Midkiff and J.E. Kobza 99

Dynamic class-based queue management for scalable media servers
A. Striegel and G. Manimaran 119

3-Disjoint gamma interconnection networks
C.-W. Chen, N.-P. Lu and C.-P. Chung 129

A stochastic software reliability model with imperfect-debugging and change-point
H.-J. Shyur 135

API documentation with executable examples
D. Hoffman and P. Strooper 143

Variable-size data item placement for load and storage balancing
Y.-C. Ma, J.-C. Chiu, T.-F. Chen and C.-P. Chung 157

Design and implementation of an Internet-based medical image viewing system
S.P. Laird, J.S.K. Wong, W.J. Schaller, B.J. Erickson and P.C. de Groen 167

doi:10.1016/S0164-1212(03)00156-0

Editorial: Software architecture – Engineering quality attributes
J. Bosch and L. Lundberg 183

Linking usability to software architecture patterns through general scenarios
L. Bass and B.E. John 187

From problem to solution with quality attributes and design aspects
J.G. Wijnstra 199

Patterns and performance of distributed real-time and embedded publisher/subscriber architectures
D.C. Schmidt and C. O'Ryan 213

Quality-driven software re-engineering
L. Tahvildari, K. Kontogiannis and J. Mylopoulos 225

Reliability prediction for component-based software architectures
R.H. Reussner, H.W. Schmidt and I.H. Poernomo 241

Analysis of a software product line architecture: an experience report
R.R. Lutz and G.C. Gannod 253

Quality-driven software architecture composition
H. de Bruin and H. van Vliet 269
